

**From Mr. Panger,
Principal**

We are excited about the addition of our new computer lab. Our pre-kindergarten through second grade students now have more opportunities to use technology for learning. The new lab will also allow our third, fourth and fifth graders to increase their time in the upstairs computer lab.

Our students have been working hard in developing skills to learn at the depth and rigor needed for academic success. I am confident they will continue to meet and exceed the requirements in all areas of the curriculum. The teachers and staff of Bivins Elementary School are dedicated to help the students continue the tradition of high achievement and excellence in the classroom by preparing them for the challenges ahead. It is important for parents to establish high educational standards and convey those expectations to their children throughout the year. Parents can also help their children succeed by making sure the children are present and on time each day.
